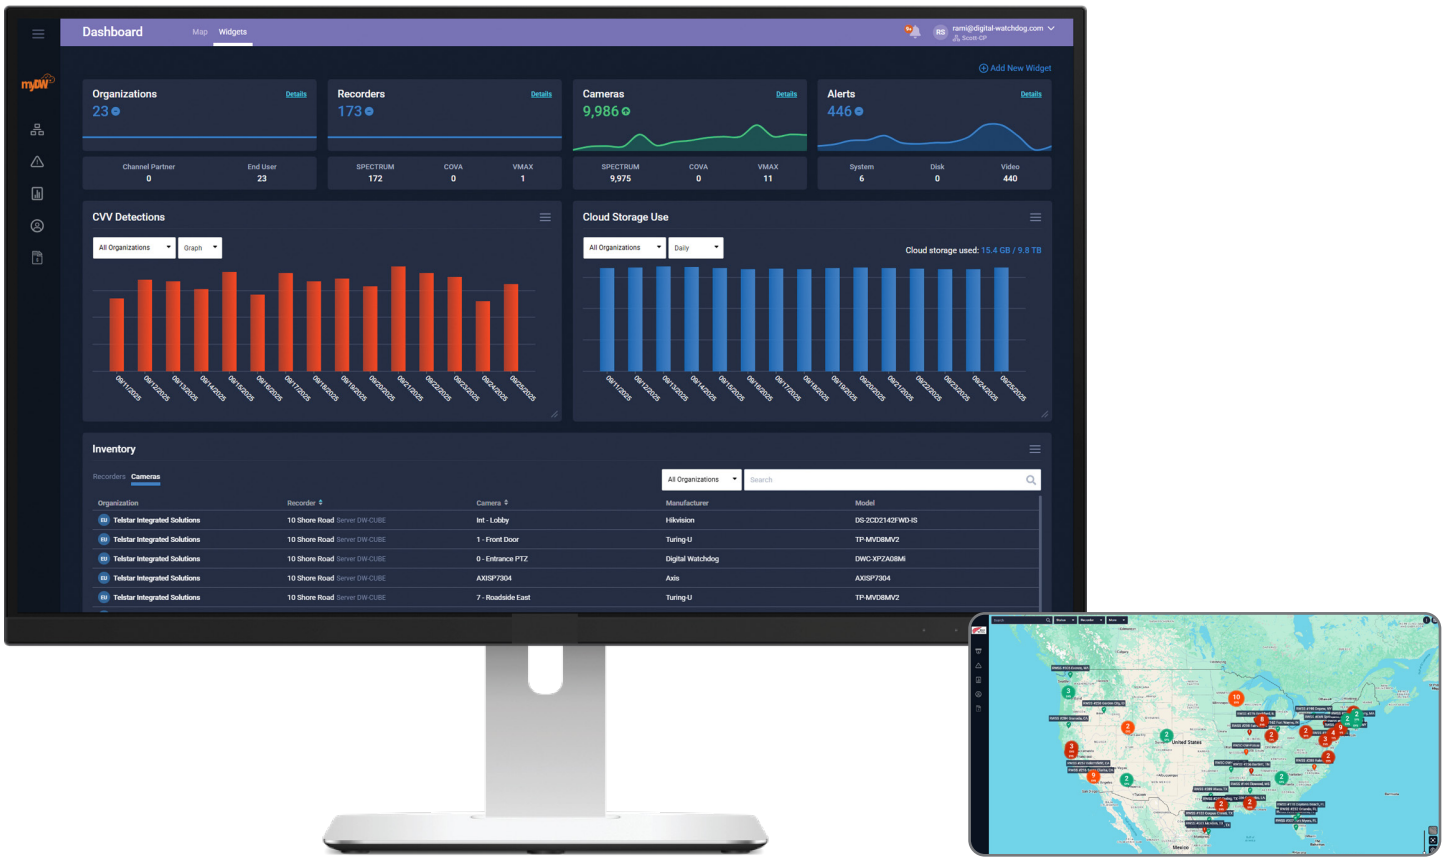
Know your system is ready. Before you need it.

Cloud-based health monitoring for your DW surveillance systems.



Monitor system health

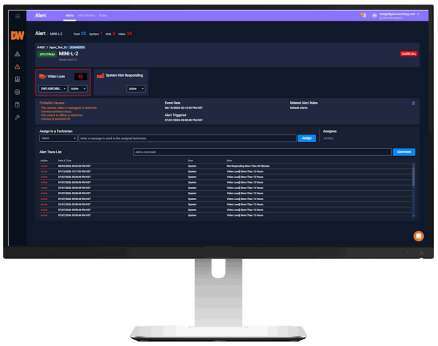
Respond to issues sooner

Reduce IT workload

Stay current at:
Digital-Watchdog.com

Improved Situational Awareness

Monitor surveillance systems from one dashboard. Smart alerts and video verification help owners identify important events, reduce false alarms and respond proactively.

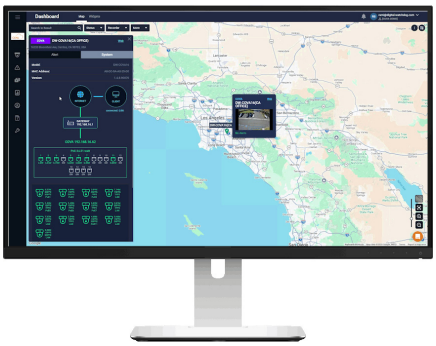


Streamlined Incident Management

Proactive event management and alert notifications help teams pinpoint incidents and act quickly. Review and assign events remotely to keep systems operational with fewer site visits.

Web Client Compatible With Any Browser

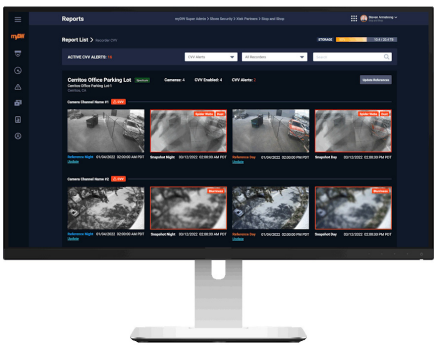
Access myDW from a responsive web browser on any operating system with one sign-on. Roaming profiles automatically load your site lists and permissions.



Share Videos With Users And Personnel Via The Cloud

Securely share cloud-backed video clips with your organization or external recipients, with flexible access duration and notes.

- Access Video Anywhere
- Share Instantly
- Share With Outside Users



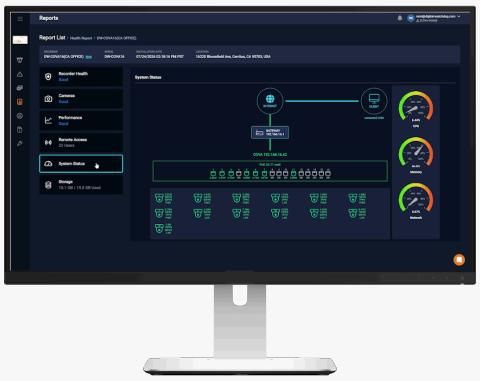
Camera View Verification (CVV™)

Camera View Verification (CVV) flags obstructions, lighting changes and scene changes, helping teams spot problems and avoid unnecessary site visits.

Get Actionable Intel With myDW Reports

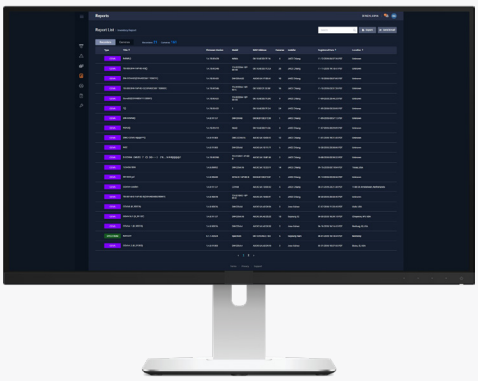
See what is running, what is installed and what your cameras are seeing.

Health Report



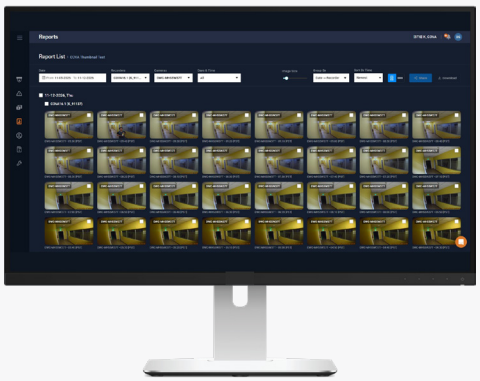
Shows recorder status, alerts, camera video loss, system performance, network activity and storage use to identify systems needing attention.

Inventory Report



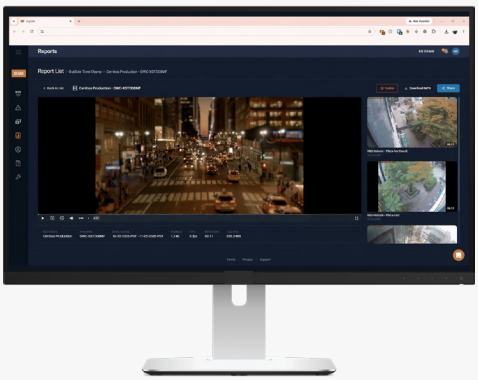
Lists recorders and cameras with model, firmware, MAC address and registration details, giving you a clear view of installed equipment.

Thumbnail Report



Displays camera snapshots over time so you can review activity, image quality and scene changes at a glance.

Timelapse Report



Condenses camera activity into short videos, with recorder, camera and duration details, so you can review hours of activity quickly.

How Does myDW Monitor Your Camera's Health?

Scene Change

CVV alerts you to unexpected changes in a camera's scene.

Image Quality

Health Reports flag reduced image quality or obstructions.

Connectivity

Reports and notifications identify network loss and connectivity issues.

Event Alerts

Event management and notifications help you address incidents quickly.

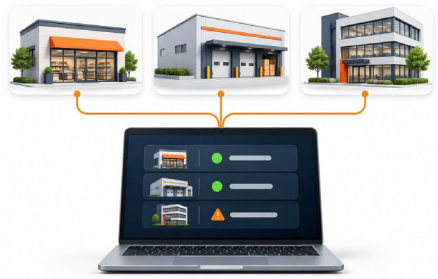
Recording Status

Monitor recording and HDD status 24/7 to catch and address video loss.

Cybersecurity With MFA

Multi-factor authentication and encrypted communications help protect access to your systems.

Remote Management



Manage systems remotely and use proactive alerts to reduce downtime and site visits.

Cloud Architecture Flexibility

Combine local recording with cloud monitoring for flexible system oversight.

Easy And Safe

Manage systems, users and permissions remotely from one location.

- SOC 2 Type I attestation provides independent assurance that its security controls were suitably designed at a specific point in time.
- No software to install: View and share clips in a browser without downloads or plugins.
- Virus-free video share: Cloud sharing avoids risks associated with improper USB use.

Open Source Software Disclosure.

Part Of The Complete DW Ecosystem

Bring DW Spectrum, Blackjack and VMAX recorders together to monitor sites, users and systems.
