

Hybrid Cloud Security Solutions

Combine on-premise reliability with cloud flexibility. DW's all-in-one platform delivers connectivity, control, and computing — scalable from terabytes to petabytes in minutes.

What is a Hybrid Solution?

DW's Camera-to-Cloud solution offers a complete, scalable, and secure all-in-one system — combining edge processing, local recording, and cloud storage powered by DW Spectrum and DW Cumulus.

On-Premises Storage

Dedicated, on-site storage maintained within your organization. Low latency and fast speeds, ideal for sensitive data and high-performance workloads.

- Full data control
- Low latency
- High-performance workloads

Cloud Storage

Store and access data remotely with unmatched scalability and flexibility. An excellent backup and disaster recovery option with minimal upfront costs.

- Global availability
- Minimal upfront cost
- Disaster recovery

Hybrid Storage

The best of both worlds. Combine on-premises infrastructure with cloud flexibility to supplement local storage with scalable public cloud, accessible anywhere.

- Maximum flexibility
- Scalable on demand
- Access from anywhere

The Future of Security is Hybrid

Organizations are strategically adopting hybrid models — deploying cloud and on-prem solutions wherever they fit best.

Boost your System, not Replace it.

Organizations learn to enhance their existing on-prem systems with cloud-based upgrades where needed.

Choice and Flexibility

No matter how your priorities shift in the future, you can adapt without starting from scratch.

Agility and Control

Organizations stay in control of how systems get deployed, remaining ready for what's ahead.

Experience the Power of Hybrid

Eliminate the need for traditional recorders. Data is processed on the camera and stored both locally and securely in the cloud.

DW Cumulus

**Trusted durability
and robust security**

Cloud storage expansion and management.

Add unlimited storage to any existing DW system with the click of a button — scale from terabytes to petabytes in minutes.

- Unlimited cloud storage expansion
- True scalability and complete system control
- Seamless integration with existing DW systems
- Empower your business to reach its full potential
- Add storage on-the-go with a single click

DW Spectrum

**Enterprise Video
Management**

Cloud-Managed VSaaS for modern security operations, DW Spectrum delivers secure, scalable video surveillance as a service — giving you total visibility, AI-powered insights, and predictable costs, all managed from a single cloud dashboard.

- Unlimited cloud storage expansion
- True scalability and complete system control
- Seamless integration with existing DW systems
- Empower your business to reach its full potential
- Add storage on-the-go with a single click

DW CloudCam

Camera-as-a-System

All-in-one cameras that eliminate the need for NVRs, DVRs, or on-premise servers. Recording, notifications, management, and monitoring — all accessed remotely.

- No server required — camera handles it all
- 1TB built-in local storage, up to 90 days retention
- Edge-based DW AI engine for real-time analytics
- Easy setup with no calibration needed
- 24/7 remote access and easy sharing

myDW

**Health
Monitoring
Service**

Proactive health monitoring for all your DW surveillance solutions from a single, cloud-based, user-friendly dashboard. Keep your systems running smoothly with 24/7 automated oversight.

- Manage users across multiple organizations from one dashboard
- Automated tools reduce IT workload — no software to install
- 24/7 proactive system health monitoring and alerts
- Single dashboard for all DW device and system status
- Instant notifications for offline devices or system issues

Benefits of a Hybrid Solution

Hybrid Storage

Expand without additional hardware and maintenance costs

Reduced Cost

Lower total cost compared to large cloud-only storage systems

Automatic Backup

Analytics, bookmarks and motion events backed up securely to the cloud

Redundant Recording

Local recording plus cloud recording reduces failure risk

Unified Management

Single console for data management across all environments

Storage Freedom

Store video on the edge, on-premise, and in the cloud

Network Resilience

Limit the risk of network failure or overburdening bandwidth

Modernize Easily

Upgrade without throwing away your existing hardware
